Mr. A. Holtzman October 27, 1976

R. B. Seligman

Reply to FTC Regarding Carbon Monoxide Method

The September 29, 1976, draft to Mr. Hatchl as revised by the October 22, 1976, letter from Allan Topol appears to be in order.

I might make one minor suggestion as follows: A great deal is said on Page 2 and 3 of the effect of the CO testing adversely affecting the tar and nicotine testing. In light of this, you might want to mention, on Page 6, Item (2), that the raw data includes not only CO but tar and nicotine values. You might want to discuss this particular item with Frank Resnik.

Other than that, I think the letter is fine.

RBS/sgr
